Paper No./Mail Date _____.
7. ☐ Examiner's Amendment/Comment
8. ☒ Examiner's Statement of Reasons for Allowance
9. ☐ Other _____.

1. The following is an examiner's statement of reasons for allowance:

Prior art fails to teach or suggest a method and a computer program product for correcting an artifact in a virtual image synthesized from stereo images, the method comprising detecting the artifact in the virtual image based on a disparity map of the stereo images, designating a source patch relative to the artifact in the virtual image, generating a target patch as a composite of a background exemplar patch and a foreground exemplar patch, each exemplar patch being identified from an image patch from at least one of the stereo images, and replacing the source patch of the virtual image with the target patch.

Prior art also fails to teach or suggest a system for correcting an artifact in a cyclopean virtual image synthesized from stereo images, the system comprising an artifact correction module that detects the artifact in the virtual image based on a disparity map of the stereo images, designates a source patch relative to the artifact in the virtual image, generates a target patch as a composite of a background exemplar patch and a foreground exemplar patch, and replaces the source patch of the virtual image with the target patch.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Claims 1-23 are allowed.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Steffens et al is cited because the reference teaches detecting artifacts based on the disparity map detected between multiple images.

Chen et al is cited because the reference teaches a scene depth imaging system wherein a foreground depth map is formed by analyzing the depth map of a scene.

Toyama et al is cited because the applicant has cited US Application Serial No. 09/528,827, which is now US Patent No. 6,806,898.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yon Couso whose telephone number is (571) 272-7448. The examiner can normally be reached on Monday through Friday from 8:30 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eileen Lillis, can be reached on (571) 272-6928. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
